

# BLDC Solar Pump Solution

Professional Solar Pump System Provider

## Applications

- Solar agricultural irrigation
- Solar aeration systems
- Solar water treatment systems
- Desert control
- Livestock
- Scenic fountains and more

- CE, TUV, ISO9001, ISO14001, OHSAS18001
- National High-Tech Enterprises

# ABOUT US

JNTECH RENEWABLE ENERGY CO., LTD

Founded in 2006, JNTECH RENEWABLE ENERGY CO., LTD is an international high-technology enterprise. It integrates the research and development, manufacture, sales and service of intelligent power electronics products in countries such as Pakistan, Kenya, Sudan, Dubai, Philippine, Morocco and Mexico.

Relying on the famous Chinese technology university's human resources and technical skills, JNTECH provides innovative products and technology through enterprise, university, and research cooperation. With more than 60 solar patents, we set the standard for solar in China and overseas. JNTECH-developed solar off-grid inverters, pumping inverters, household energy storage inverters and related systems are widely used in more than 60 countries. JNTECH has been listed in the bidding catalog as a preferred brand for international projects by the IBRD, the United Nations, FAO, and a wide variety of NGOs. Over the years, the JNTECH brand has become synonymous with quality and experience.

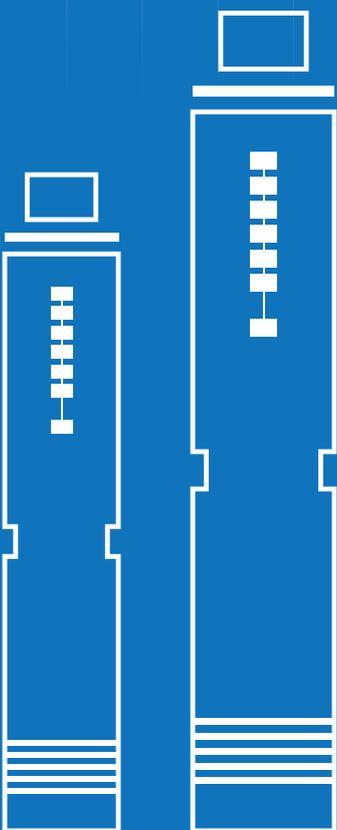

We strive to be the world's leading provider of intelligent solar energy products, solar irrigation and water treatment systems, and solar ecological treatment systems. Following our motto of "Creating a green-energy future, ensuring sustainable social development," JNTECH takes a scientific approach to creating green, eco-friendly new energy – not just as a business, but as our duty to our society, our nation, and the world.

This brochure aims to introduce the BLDC solar pump solution, including the controller, water pump, model selection, and the configuration of the system's solar panels.

## BLDC Solar Pump Solution

## BLDC Solar Pump Solution

### System application

### System applications

The BLDC solar pump solution is designed for both short- and long-term water supply in diverse areas without electricity.

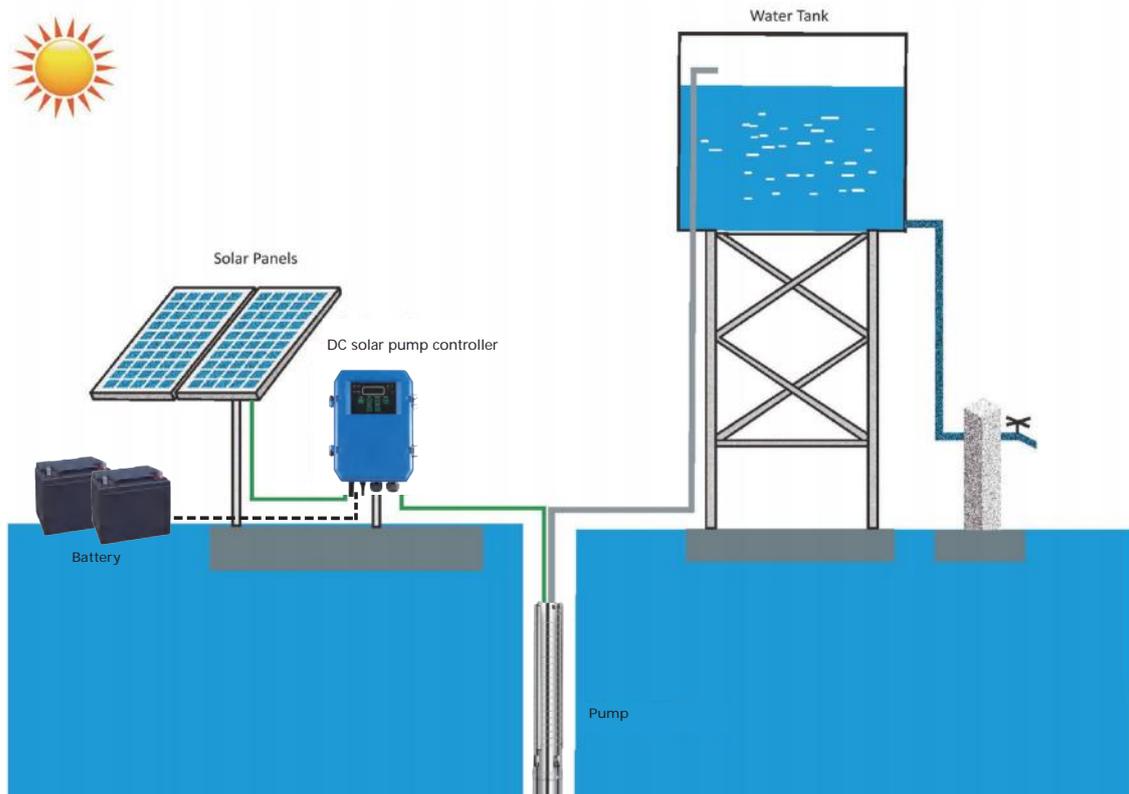

- Daily water usage
- Swimming pool water supply
- Small-scale agricultural irrigation
- Pasture animal husbandry
- Garden irrigation and more

### BLDC solar pump solution includes:

- Solar panel
- Solar mounting structure
- Controller
- BLDC Solar pump
- Cable, pipe, etc
- battery (optional)

### Core advantages:

- Solar panel: 25-year design life
- Pump & controller: 5-year design life
- IP65 protection level
- More than 10 layers of protection
- Easy to maintain, low cost
- Working temp. -15 °C ~ + 60 °C.

# BLDC Solar Pump Solution

JNPD12~JNPD110

JNPD110-1500W~JNPD300-2500W

## DC Solar Pump Controller

### Operational range

- The controller should be installed in well-ventilated locations to facilitate heat dissipation.
- Adapter pumps: brushless DC pump

### Power range

- For maximum 2200W water pump

### DC solar pump controller features

- MPPT function for higher solar power utilization rate
- IP65 controller waterproof grade
- LED display for power, voltage, current, speed and other operational parameters
- Cloudy weather adaptation
- Soft start: No impulse current, protecting the pump motor
- High voltage/Low voltage/Over-current/High temperature protection
- Ambient temperature: -15°C~+60°C

### DC solar pump controller parameter

## AC/DC Solar Pump Controller

### Operational range

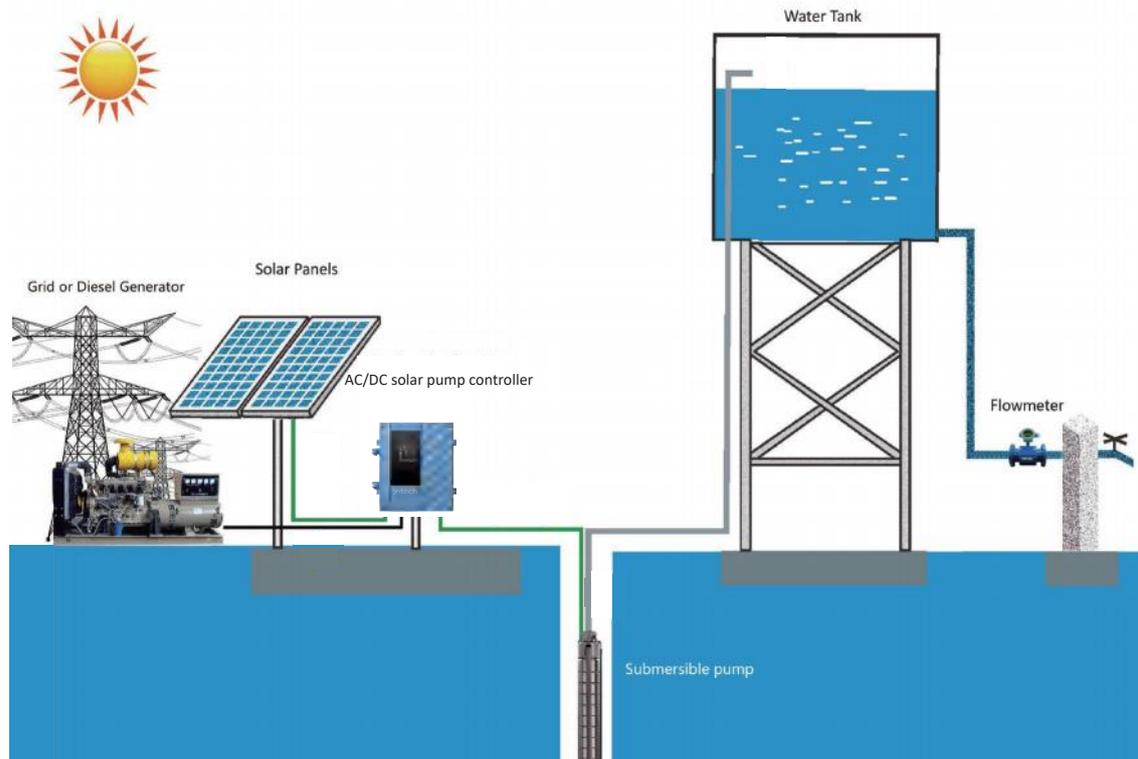

- Adapter pumps: brushless DC pump

### Power range

- For maximum 4000W water pump

### AC/DC solar pump controller features

- Strong overload capacity, can drive DC brushless water pump
- 99%+ efficiency with maximum power point tracking technology
- Wide MPPT input voltage range
- Fanless design, outdoor model, IP65 protection class, suitable for harsh application environments
- -15°C ~ +60°C operating range; Power derated above 60°C
- Utility grid/DG or photovoltaic input, automatic switching with PV priority, complementary energy usage to keep the pump running and achieve 24-hour water supply
- Complete system protection including undervoltage, overload, overvoltage, overcurrent, grid power phase lose, well dry, lost output phase, short circuit, and overheating
- Automatic operation control, soft start and soft stop, unattended operation

Solar pump controller & pump

## JDS Series - SCREW SOLAR PUMP WITH SS304 INLET/OUTLET

Borehole pump, screw pump series, low flow and high lift.  
Satisfy the essential water demands, water needs for humans and animals.

Screw

NSK Bearing

Stainless Steel Oil Cylinder

## JDP Series - AC/DC , WV Series SOLAR PUMP WITH PLASTIC IMPELLER

A borehole pump with plastic impeller series. Comes with stainless pump head standard.  
Best applied in locations with clean water. Perfect for irrigation.

## JDPH Series - SOLAR PUMP WITH PLASTIC IMPELLER

### Hydraulic Performance Curves

## JDPH Series - AC/DC , WV Series SOLAR PUMP WITH PLASTIC IMPELLER

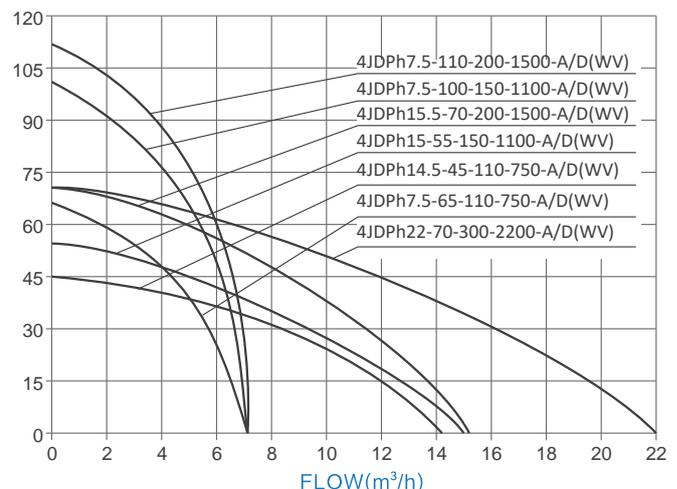

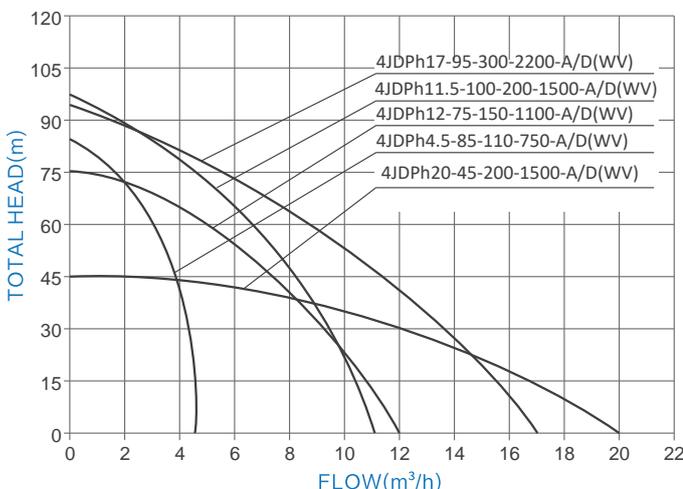

A borehole pump with plastic impeller series. Comes with stainless pump head standard. Best applied in locations with clean water. Perfect for irrigation.
